

PL-12 LIQUID BIOHAZARD WASTE CONTAINER

CODE: PL-12

DESCRIPTION

The **PL-12 Liquid Biohazard Waste Container** is engineered for regulated environments and designed to safely collect and store biological and infectious liquid waste in healthcare settings. Manufactured from durable, puncture-resistant materials, it provides reliable containment with minimal risk of leaks or breaches.

The high-visibility yellow exterior supports proper waste segregation, while the hermetic lid delivers a secure seal to reduce contamination risks.

The chlorine-free composition, with exceptionally low heavy-metal content, is engineered to support clean combustion in controlled incineration processes, helping to minimize environmental emissions.

FEATURES

- Chemically resistant material that maintains integrity when exposed to a wide range of substances
- Meets regulatory standards for the safe management of hazardous waste
- Reinforced construction designed to prevent punctures and structural damage
- Recommended for high-risk storage areas in hospitals, clinics, and laboratories

Complies with
**NOM-087-SEMARNAT-2002
STANDARD**

Biological waste only

Hazardous waste only

Sharp object protection

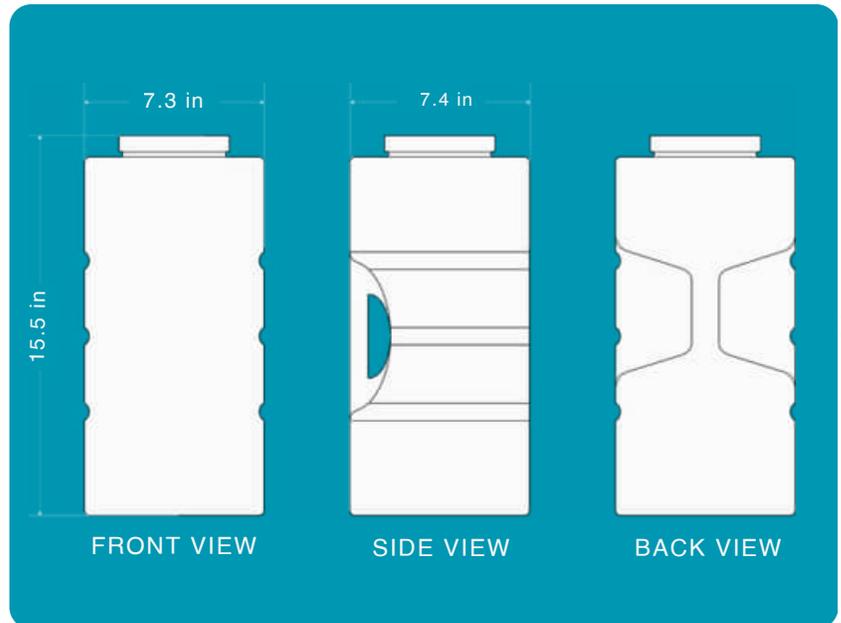

Controlled incineration

DIMENSIONS

	Length	7.3 in
	Width	7.4 in
	Height	15.5 in
	Weight	16 oz
	Capacity	3.2 gal

MATERIAL COMPOSITION

	Chlorine-free
	Total heavy-metal content: ≤ 1 ppm

DESIGN & USE

- The **PL-12 Container for Liquid Biohazard Waste** is engineered for the safe management of biological and infectious liquid waste, and includes an airtight lid to prevent leaks and contamination. The high-visibility yellow color supports accurate waste identification
- Designed for demanding healthcare environments, it delivers chemical resistance, a non-slip base, and a stackable structure for efficient storage. Compliant with sanitary regulations, it ensures reliable performance in hazardous-waste applications

Guaranteed safety in hazardous waste handling!
