

VIC-140 HD

DESCRIPTION

The material of the trash can **VIC-140 HD** is HDPE which gathers the highest fluidity conditions and the highest resistance to hits and breaks. The body is manufactured through an injection molding process in one piece without riveted parts; this helps avoid stress points or fragility that could affect its resistance.

- It includes UV protection that guarantees less wear and tear.
- It has two parts: body and lid.
- The slightly concave lid avoids the retention of dust or water.
- The double handle on the lid makes for better discharge or storage of waste.
- Its conical body has a smooth interior and rounded corners that avoid the accumulation of residues.
- Two rubber wheels of 8" fixed to an axle for better transportation.
- Low costs of investment and maintenance.
- It's manufactured under international norms and standards for working with an automated waste collection system.

FUNCTIONALITY

The design of the trash can **VIC-140 HD** makes for an easy manual or automatic transfer of residues.

- Since it doesn't have edges or defects, it facilitates the cleaning and discharge of waste.
- The lid, slightly larger than the body, achieves hermetic sealing; this prevents the leakage of bad odors and sources of infection and water from entering.
- Easy to transport since it's stackable.

CUSTOMIZATION

We can label it with the legend of the type of material or your logo according to your needs.

FEATURES

CAPACITY: 140 L (37 US gal).

WEIGHT: 22 lb.

TRASH CAN COLOR CODING:

- grn** Organic: Food, fruits, and vegetables.
- bl** Plastic: Bottles.
- gr** Inorganic: Fabric, shoes, boxes, etc.

MEASURES:

- Length:** 21 in.
- Width:** 18.52 in.
- Height:** 3 ft 5 in.

Volumes, dimensions, and other measures are nominal and may vary by approximately 2%.
