

RECYCLING STATION

24A VERTICAL BIN STAND & 24B VERTICAL BIN STAND

DESCRIPTION

These **RECYCLING STATIONS** consist of three 8L (2.1 gal) bins, each made from high-strength polymer designed to withstand impacts and prevent deformation.

- The units feature UV protection and maintain their performance even under sudden temperature changes
- The design provides sufficient spacing between bins to make waste disposal easier and prevent oversized bags from entering
- The interior is completely smooth and features rounded edges that minimize residue buildup and make cleaning easier
- Each bin includes a pair of integrated hooks for quick installation
- The design allows for easy emptying

VERTICAL BIN STAND

- The stand is manufactured from 3/8" solid round bar, and the advertising panel is made of 18-gauge galvanized sheet metal measuring 5.1 x 11 in. The base consists of a 5/8" plate with dimensions of 9.2 x 7.9 in
- The bin mounts effortlessly onto the structure
- The design ensures minimal investment and maintenance costs

DESIGN & USE

- With a tower-style design, these stations are ideal for locations with limited space
- Ideal for managing waste efficiently, these stations promote cleanliness and organization in public areas
- These bin stands can be deployed in hospitals, schools, government offices, residential complexes, restaurants, and other high-traffic settings
