

BAR-500 WITH BROOM

DESCRIPTION

The material of the **BAR-500** is medium-density polyethylene in one piece with a tubular structure that grants it higher resistance to impacts and avoids deformations. It has UV protection.

- Two tractor-type wheels of 10" (front) and two caster wheels of 4" for easy transportation.
- The design makes it lean forward and facilitates discharge.
- The metallic structure has double protection against rust and corrosion due to rain or weather conditions.
- A storage box for the operator equipment.
- An optional dual aperture lid.

FUNCTIONALITY

- The **BAR-500** is mostly used for trash collection and the separation of different types of residues.
- Ideal for trash collection on public roads or buildings.
- Manual discharging.
- Easy to clean.
- Avoids sources of infection.

CUSTOMIZATION

We can label it with the legend of the type of material or your logo according to your needs.
