

23 VERTICAL RECYCLING BIN STAND

CODE: CON-CST-AP-23

DESCRIPTION

The 23 Vertical Recycling Bin Stand is a versatile solution designed for waste collection and separation in indoor environments where efficiency, organization, and optimal space utilization are required. This compact model allows placement in areas with moderate foot traffic without obstructing user movement.

The stackable design enables modular configurations, allowing multiple units to be vertically stacked to create adaptable waste separation stations.

This system maximizes available space and improves organization in offices, educational facilities, retail spaces, and administrative areas.

Built for continuous use, the unit maintains stability and strength under daily handling. Its geometry provides balanced support, reducing the risk of shifting or tipping during operation.

FEATURES

- Stackable system for modular configuration
- Compact design for limited-space environments
- Durable construction for continuous service
- Smooth surface that simplifies cleaning
- This stable shape reduces tipping risk
- Suitable for basic waste separation

23 VERTICAL RECYCLING BIN STAND DIMENSIONS

	Length	14.5 in
	Width	15.3 in
	Height	10.6 in
	Capacity	6 gal
	Bin stand capacity	18.2 gal

Container color coding:

- Organics**
- Inorganics**
- Plastics**
- Mixed waste**
- BIHW**
- Recyclable materials**

DESIGN & USE

- Maximizes available space
- Simplifies waste sorting and organization
- Reduces cleaning and maintenance time
- Improves the overall appearance and order of the environment

Simplify waste management and enhance safety
