

MSD-120 TRASH CAN

TECHNICAL SPECIFICATIONS:

Capacity:	31.7 gal
Weight:	22 lb
Material:	High-strength polymer
Rigid wheels:	Two 200-mm wheels with a steel axle
Body and lid fastening:	Two plastic caps and hinges
Available colors:	Green, blue and gray

FEATURES

- Manufactured from 100% virgin polymer through a high-precision injection-molding process
- The container's conical body features rounded contours and smooth surfaces for a cleaner, more modern finish
- The extra-thick walls surpass industry standards, providing enhanced strength and reliability
- Completely free of rims, impurities, or burrs, which makes both emptying and cleaning noticeably easier
- Even when empty, the container remains stable in winds up to 37.2 mph due to its engineered balance of width, height, and weight distribution
- The improved lid design keeps the interior out of sight and significantly limits odor release
- A built-in overlap ensures an airtight seal, while ergonomic handles support effortless maneuvering and lid operation
- Two 200 mm rigid wheels—manufactured from premium solid rubber & polymer and a 0.8 in solid-steel axle—deliver smooth, durable performance
- In addition, this trash can provides outstanding durability and exceptional resistance to impacts, chemicals, environmental exposure, and extreme temperature changes
