

METAL WASTE CONTAINER

DESCRIPTION

The creation of the **METAL WASTE CONTAINER** comes from the necessity of covering the particularities of the user resulting in manufacturing it with cutting-edge technology.

- The material of the waste container is 18 gauge black steel with double protection against rust and corrosion due to rain or weather conditions.
- Four caster wheels of 6" for optimal handling of the waste container.
- Polyethylene and steel pickup pockets for better transportation.
- Fire resistance: it doesn't burn. Since it's airtight, the fire goes out for lack of oxygen.
- The design and geometric pattern prevent rainwater filtration and allow quicker movement of residues when it discharges.
- The automatic fastening of the lid secures the impenetrability of the container and avoids bad odors and sources of infection.
- It opens with a pedal which facilitates its access.
- It has two discharging modes, one for the user and another for garbage trucks.
- The lids have rubber on their ends which allows a soft closing.

FUNCTIONALITY

The **METAL WASTE CONTAINER** offers a hygienic way of handling residues for the environment, the user, and the operator.

- Heavy duty.
- Any lift system can discharge the waste.
- It's hygienic for the user and environment.

CUSTOMIZATION

We can label it with the legend of the type of material or your logo according to your needs.

FEATURES

CAPACITY: 2600 L (686 US gal)

WEIGHT: 295 lb.

WASTE CONTAINER COLOR CODING:

- grn** Organic: Food, fruits, and vegetables.
- gr** Inorganic: Fabric, shoes, boxes, etc.
- yl** Paper: Paper, cardboards, newspapers, etc.

MEASURES:

Length: 6 ft 1 in.

Width: 4 ft 3 in.

Height: 5 ft 3 in.

Volumes, dimensions, and other measures are nominal and may vary by approximately 2 %.
