

# BATTERY RECYCLING CONTAINER

CODE: CON-RB-49

## DESCRIPTION

The Battery Recycling Container is designed for secure collection and storage of used batteries, contributing to responsible hazardous waste handling.

Durable and practical, the container protects surrounding areas and allows for temporary storage at collection sites, workplaces, educational institutions, or public areas.

Robust construction resists impacts, corrosion, and chemical agents, providing extended service life.

The sealed, ergonomic design helps prevent spills and leaks, keeping the environment clean and safe.

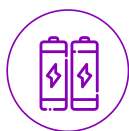

## FEATURES

- Optimized capacity for effective separation of alkaline and button batteries
- High-visibility informational graphics encourage responsible recycling practices
- Space-efficient design suitable for indoor and outdoor placement
- Commonly used in retail stores, electronics shops, and commercial malls

Safely place used batteries inside your facility

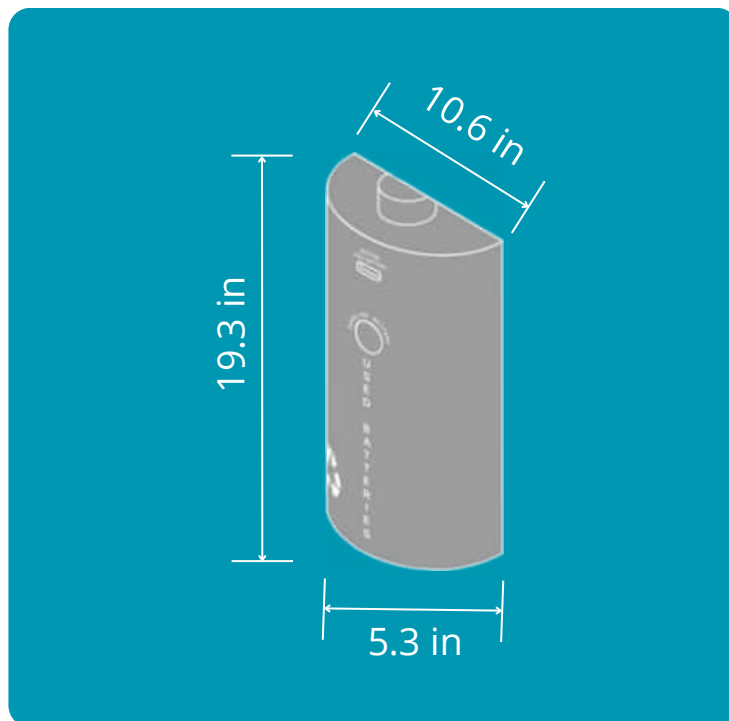

Alkaline and button cell battery divider

Two separate compartments for efficient sorting

## DIMENSIONS

Length	10.6 in
Radius	5.3 in
Height	19.3 in
Weight	4.4 lb

## DESIGN & USE

- Reliable solution for safe battery disposal in high-traffic public and industrial locations
- Closed, robust body helps reduce contamination in collection areas
- Structural design limits water retention and dirt accumulation, promoting cleaner spaces
- Rear access simplifies emptying and servicing operations
- Built for long-lasting performance with reduced maintenance frequency
