

# WASTE OIL CONTAINER 200

## CUSTOMIZATION

We can label it with the legend of the type of material or your logo according to your needs.

## DESCRIPTION

The material of the **WASTE OIL CONTAINER 200** is medium-density polyethylene that gathers the highest fluidity conditions and the highest resistance to hits and breaks.

- Heavy duty.
- The container has two parts: one container of 200 L and a lid that works as a funnel to fill the container.
- The lid works as a funnel to filter the residues.
- The smooth interior prevents the accumulation of residues.
- It has the option of adding three caster wheels of 3" for better transportation.
- Low costs of investment and maintenance.
- It's manufactured under international norms and standards for working with an automated waste collection system.

## FUNCTIONALITY

- The design of the **WASTE OIL CONTAINER 200** makes for an easy manual or automatic transfer of residues.
- Since it doesn't have edges or defects, it facilitates the cleaning and discharge of waste.
