

ECOBALANCIN RECYCLING STATION

CODE: ECOBALANCÍN

DESCRIPTION

The Ecobalancin Recycling Station is designed to simplify proper waste sorting through a practical, intuitive, and efficient system.

The station features clearly defined colors and icons for easy identification of different waste types, including recyclables, sanitary waste, and organics.

The station makes the separation process straightforward from the first use, encouraging responsible habits in any environment.

Additionally, the Ecobalancin Recycling Station features a modular system of 2 to 5 containers, adapting to a variety of sorting needs and space types.

ECOBALANCIN QUAD

FEATURES

- High-strength polymer
- Modular configuration with 2 to 5 containers
- Swing lid for easy waste disposal
- Color-coded system with clear icons for identification
- Designed for integration into waste separation systems

DIMENSIONS

Length	Variable depending on the number of containers
Width	9.5 in
Height	30 in
Capacity of each bin	14.52 gal

ECOBALANCIN DUO

ECOBALANCIN TRIO

Container color coding:

- gre **Organics**
- gra **Inorganics**
- bl **Plastics**
- yel **Mixed waste**
- re **BIHW**
- ora **Recyclable materials**
