

ECOL HD RECYCLING STATION

CODE: ECOL 360 HD4 / 180 HD2 / 270 HD3 / 450 HD5

DESCRIPTION

The ECOL HD4 Recycling Station promotes efficient waste separation in schools, universities, and public areas. This system features 23.8-gal waste bins manufactured from high-strength polymer, ensuring long-lasting performance against impacts, deformation, and outdoor conditions. Functional and hygienic, the station adapts to a wide range of installation requirements.

Swing lids on each container allow easy waste disposal, restrict access for large bags, and conceal the contents, helping maintain a clean and organized environment.

Ecol-360-HD4

Ecol-180-HD2

Ecol-450-HD5

Ecol-270-HD3

Resists sudden temperature changes

Built to resist impacts

Designed for use in green areas and parks

FEATURES

- Includes 2 or more waste bins
- Manufactured from high-strength polymer
- Durable under UV exposure and various weather conditions
- Swing lid ensures convenient and safe use
- Galvanized 18-gauge panel suitable for advertising or signage

WASTE BIN DIMENSIONS:

Length	18.1 in
Width	18.1 in
Height	35 in

RECYCLING STATION DIMENSIONS:

Length	Variable according to the number of waste bins
Width	27.5 in
Height	5 ft

Container color classification:

- gre **Organics**
- gra **Non organics**
- bl **Plastics**
- yel **Mixed waste**
- re **BIHW**
- ora **Recyclable materials**

DESIGN & USE

- Encourages environmental education and recycling habits
- Designed for efficient waste separation in high-traffic areas
- Modular structure allows configuration based on container needs
- Quick assembly and low-maintenance design
- Adaptable installation for different surfaces and surroundings

Make waste management simpler and safer
