

# EUROPE RECYCLING STATION

## DESCRIPTION

The **EUROPE RECYCLING STATION** consists of multiple EUROPE 50 HD trash cans made of HDPE that gather the highest fluidity conditions and higher resistance to hits and breaks.

Body in one piece without riveted parts; this helps prevent stress and brittle points.

- UV protection.
- The trash can has two parts: a body and a lid.
- The outer part of the lid is plain and avoids water or dirt accumulation.
- It has a smooth interior and round corners that avoid waste accumulation.
- According to your needs, we can add 2, 3, and 4 trash cans of 50 L.
- An opening of 3.9 in. avoids the deposit of trash bags larger than 6 to 8 L.
- The trash can is detachable as it features an access key to remove waste.
- It has three installation options: with a pole embedded in the floor, with a plate, or for display.
- It has the option of adding an advertising panel.
- The frame is made of a stainless-steel tube with a spherical end cap on top.
- A galvanized steel supporting axle.
- The advertising panel is made of an 18-gauge galvanized sheet.
- Low costs of investment and maintenance.
- An anti-vandal system with a bolt and a special key.
