

SELF-WATERING PLANTER

DOUBLE

DESCRIPTION

The material of the **DOUBLE SELF-WATERING PLANTER** is medium-density polyethylene through an injection molding process which allows manufacturing in one piece without riveted parts. This helps avoid stress points or fragility that could affect its resistance.

- Highly resistant to any weather conditions.
- UV protection.
- Its double wall allows storing water.
- Seven holes for water reabsorption.
- A hole for discharge.
- It doesn't need special preparation for its installation.

FUNCTIONALITY

The **DOUBLE SELF-WATERING PLANTER** is a modular system that can be placed practically on every building or household.

Its storage capacity and reabsorption of water allow reducing maintenance. Perfect for growing vegetables. It allows keeping plants without watering for an extended time. It's perfect for any place, outdoors or indoors, where you need to have plants.

Very useful in squares, gardens, green roofs, households, offices, schools, hospitals, shopping malls, etc.

CUSTOMIZATION

According to your needs, it can be labeled with your logo or the caption of the type of material it contains.
