

SELF-WATERING PLANTER

ROUNDED

TSSM-MR46

TSSM-MR59

DESCRIPTION

The material of the **ROUNDED SELF-WATERING PLANTER** is medium-density polyethylene through an injection molding process which allows manufacturing in one piece without riveted parts. This helps avoid stress points or fragility that could affect its resistance.

- Highly resistant to any weather conditions.
- UV protection.
- Its double wall allows storing water.
- Three holes for water reabsorption.
- A hole for discharge.
- It doesn't need special preparation for its installation.

FUNCTIONALITY

The **ROUNDED SELF-WATERING PLANTER** is a modular system that can be placed practically on every building or household.

Its storage capacity and reabsorption of water allow for reducing maintenance. Perfect for growing vegetables. It allows keeping plants without watering for an extended time.

It's perfect for any place, outdoors or indoors, where you need to have plants.

Very useful in squares, gardens, green roofs, households, offices, schools, hospitals, shopping malls, etc.

CUSTOMIZATION

According to your needs, it can be labeled with your logo or the caption of the type of material it contains.
