

PL-12 LIQUID WASTE DISPOSAL CONTAINER

DESCRIPTION

The material of the disposable **PL-12 LIQUID WASTE DISPOSAL CONTAINER** is polypropylene with no more than 1 ppm of heavy metals; it's chlorine-free.

- The view from the translucent container avoids overfilling.
- It's sterilizable, incinerable, and it doesn't pollute.
- Leak-proof and fracture-resistant if it falls.
Destructible by incineration.
- It has a safe and secure lid and an airtight seal.
- Puncture resistance of 12.5 N.
- It's labeled with the caption "IV FLUIDS AND LIQUID BIOHAZARD INFECTIOUS WASTE" and it includes the universal symbol of Biohazard.
- It complies with the **NOM-087-SEMARNAT-SSA1-2002** standard.

FUNCTIONALITY

The red **PL-12 Liquid Waste Disposal Container** stores blood and non-anatomical waste, and the yellow stores liquid pathological waste. Both guarantee the correct disposal of biohazard infectious waste.

According to the **NOM-087-SEMARNAT- SSA1-2002** standard, once the seal is secure, it can't be opened or emptied.

CUSTOMIZATION

It includes the symbol and the caption "Biohazard."
