

EVOLUTION 300

3-COMPARTMENT TRASH CAN

DESCRIPTION

- The recycling system **Evolution 300** has a storage module with three containers: a main container of 135 L and one on each side of 82.5 L.
- The main container of 135 L is perfect for higher volume waste; the side containers of 82.5 L are ideal for waste generated in lower volumes.
- The inlets are round without sharp edges to avoid accidents.
- The material of the storage module is polyethylene in one piece; it has four caster wheels, two hinges to be attached to the wall, and a security lock.
- The reinforced security hook lock uses a special triangular key.
- Colors: granite, green, gray, or Mexican pink (other colors upon request).
- Since the material of the module and the containers is polyethylene, it doesn't require paint or maintenance.
- The graffiti removes easily from the module.
- They are clean with water.
- A product 100% national.

INSTALLATION

- 1.- Locate the position where you're going to install the **3-Compartment Trash Can Evolution 300**. You will need a wall to fix the module with hinges; the ground has to be smooth and leveled with a free surface of 3 ft 9 in. x 5 ft 3 in.
- 2.- Fix the posterior module hinges to the wall with screws and dowels.
- 3.- Fasten to the wall the striking plate of the security lock.

CUSTOMIZATION

We can label it with the legend of the type of material or your logo according to your needs.
