

VIC-120 HD

DESCRIPTION

The **VIC-120 HD** heavy-duty trash can is made of high-density polyethylene which gathers the highest fluidity conditions and great resistance to hits and tears.

- Made through an injection molding process which allows it to produce the body in one piece, without riveted parts. This helps avoid stress and breaking points that could affect their resistance.
- It includes UV ray protection which guarantees less wear and tear.
- It's composed of two pieces: lid and body.
- A lid slightly concave that avoids the retention of dirt or water.
- It has a double handle on the lid for better use of discharge or deposit.
- A conical body with a smooth interior and rounded corners that avoids the accumulation of residues.

- UV ray protection.
- It has two 8" rubber wheels attached by a single axle that helps for a better transfer.
- Low costs of investment and maintenance.
- Manufactured under international norms and standards for working with an automated waste collection system.

FUNCTIONALITY

- The **VIC-120 HD** heavy-duty trash can is designed for the deposit of waste.
- The waste can be discharged through any lift system.
- It doesn't have any edges or defects which facilitate its cleaning and discharge.
- Adapted for interiors as its size and lightness allow you to have a good movement in your activities.
